1646 When I try to use bluetooth headphones with Lubuntu 14.04 (with kernel 3.16.0-50-generic) I cannot hear anything. I tried a command: 'rfkill unblock bluetooth' but the same result. How can I solve this issue? kevdog: I installed ubuntu 14.04 and I checked the battery life. It is better than in windows. But if I have a lot of torrents open and play online streaming music, then it drops to about 30%. If I am not using it for some time, then I can get up to 80% or something. Launchpad bug 1368585 in bluez (Ubuntu) "Set default USB device mode to notify/event (via DBus)" [Undecided,Fix released] Guest81096: I know you said 14.04. I'm not 100% sure if it will work for you with the latest kernel but it seems to be an issue for a lot of people with either 14.04.1 or the newest kernel kevdog: Sorry. I meant 14.10 kevdog: It's so weird. I don't know what's going on. But thank you for the help. I'll go to sleep and try tomorrow. :) Guest81096: I don't know if this will work or not but I am fairly new to the linux world so good luck: Guest81096: You also might want to read this: hey guys simmy_: Hi,, waiting for a reply. is there a channel 82157476af
